

Agenda 21/30, Earth Day and the Green New Deal are more Red than Green.

Earth Day has been celebrated by those who promote Agenda 21/30, Climate Change and the Green New Deal.

April 22, the date chosen for the first Earth Day in 1970, was also the 100th birthday of Vladimir Lenin—the Russian revolutionary who became the first head of the USSR after the Revolution of 1917. Communists are well known for celebrating anniversary dates and this is one example.

Even still today, as stated on their website, **the Communist Party USA supports the Green New Deal** but purportedly wants it to go even further and include job security for those who are displaced as a result of converting to non-fossil fuels.

When the first Earth Day was celebrated in 1970, to the unsuspecting it seemed like a good idea. After all, being good stewards of our environment is certainly a virtue. However, the hidden agenda was a different story. Washington University biologist, Barry Commoner, stated in 1970, “We are in an environmental crisis which threatens the survival of this nation, and of the world, as a suitable place of human habitation.”

Was this a reference to global warming? Guess again. Ecologist Kenneth Watt opined in 1970. “If present trends continue, the world will be about 4 degrees colder for the global mean temperature in 1990, but 11 degrees colder in the year 2000. **This is about twice what it would take to put us into an ice age.**”

Oops. That duck didn’t float, so the hue and cry became just the opposite – Global Warming. That has since become so well exposed as being a hoax that it has morphed into Climate Change, which very conveniently, covers any climate event and is now being promoted big time by the Green New Deal.

Alexandria Ocasio-Cortez’s recent statement questioning having babies is not new. Earth Day organizers have pronounced “Too many cars, too many factories, too little water, and too much carbon dioxide — all can be traced easily to *too many people*” said Ehrlich in *The Population Bomb*. His solution? Reducing the world’s population could be done by mandated sterilizing water or food. This is in spite of the fact that carbon dioxide is not toxic. Indeed, it is a desirable plant food.

Environmental Handbook editor, De Bell, recommended that, **after halting world population growth, we “work toward reducing the current three and a half billion people to something less than one billion people ...”**

Gaylord Nelson, equating man with animals said, “Man is just one of the creatures that the Lord put on this earth **and is not more important than all the rest.**” (Translated: Since polar bears are becoming extinct, we should reduce mankind to save them. This is even though the polar bears are actually increasing in number.)

Lynn White, Jr., even said that religion itself needed to be altered. “More science and more technology are not going to get us out of the present ecologic crisis until we **find a new religion, or rethink our old one.**”

You can be sure that the Powers--that-be mean business. The plan is not only to downsize the population, but also, to downsize the standard of living of the remaining citizens as they are considered to be “environmental culprits.”

A new document on a French Non-governmental organizations’ website states the universal goals:

“New single-family home construction, except trailers, prohibited. New buildings must be exclusively condos with a maximum per capita living area of 320 square feet.”

“For short trips less than 3 miles, the standard should be ‘soft transport’ (bicycles)... Mandatory fixed working hours in order to simplify the implementation of public transport and carpooling.”

“Quotas to limit the consumption of imported products. Especially coffee, chocolate, exotic fruits...ban on substitutable processed foods, sodas, all junk food, hamburgers, pizzas, pasta, chicken nuggets...Meat consumption to decrease by 10% per year from 2020 to 55 pounds per person per year in 2030...the consumption of dairy products will follow the same trend.”

The plan is to limit, then totally eliminate, beef and then dairy. The goal is to control our food intake. It is a common practice that when communists take over a country, they take control of the food supply. When Castro took over Cuba, he took food away from the citizens. Hungry school children were told to pray to God for food. After a few days they were told to pray to Castro and Viola ! Food appeared.

One recent example of what lengths to which climate enthusiasts will go, is: this:: A federal judge dismissed a climate lawsuit brought in the name of two young Philadelphia boys. One was seven and the other eleven. This is part of a dangerous new legal tactic being attempted by climate campaigners to use children as props and plaintiffs.

President Trump has rightfully withdrawn America from the Paris Climate Accord which sets high standards for reducing fossil fuels.

Former Secretary of State, **John Kerry**, the man who negotiated and signed the Paris Climate Accord on behalf of the United States, calling for reducing fossil fuels, called President Trump’s withdrawal to be “criminal.”

Kerry is working on a new international initiative that will seek to punish President Trump and other politicians for failing to implement their “climate change agenda”. “People can mock the concept of climate change with impunity and there is no cost to pay. That’s got to stop.”

Indeed, at a conference, hosted by the University of Southern California, leaders from government, business and academia discussed ways to overcome the political obstacles to combating their climate change goals.

Already, in one community after another, reasonable energy sources have unnecessarily been exchanged for the far more costly and less effective solar and wind energy sources; **in one community prices were driven up to average over \$1,000 a month per household.** Also, green energy use is diminishing our ability to depend on having energy. **Brown outs have resulted in** electricity being turned off from late evening to dawn, mandatory thermostats set at low temperatures and no hot water.

To varying degrees in America, county governments have imposed regulations on housing. The plan is for all humans to live in metropolitan areas, in government housing buildings, where they are more easily controlled than in private, individual and scattered housing. Living in government housing would prevent you from owning a gun; an unarmed citizenry cannot defend themselves and does not have the means to depose a dictator.

The Green New Deal advocates no airplanes and only government transit rails between cities., as well as all buildings be refitted to meet their standards at the cost of untold trillions. .

Walking and bicycle paths are already being constructed for local travel. . When transportation is limited the loss of mobility is the loss of freedom.

The exception to all of the above regulations, of course, is the ruling elite, themselves.

Sure, we have changes in the climate – we always have had, but there is no solid evidence that we humans are the cause.

The rationale for requiring these drastic measures is based on flawed studies and false statistics, backed by scientists, (most of whom are not weather scientists,) who have been misinformed or otherwise compromised.

But, many scientists disagree. .A petition signed by more than by 300 scientists has been given to President Trump to get us out of the 1992 United Nations Framework Convention on Climate Change (UNFCC.) This UN convention provides the rationale and means for the UN to impose socialism on the member nations as has always been its goal.

On Earth Day 1970, Norman Cousins bluntly stated: “Humanity needs a world order. The fully sovereign nation is incapable of dealing with the poisoning of the environment.” He argued that “management of the planet ... requires a world-government.” (Emphasis mine,)

We must oppose and expose Agenda 21/30, Climate Change and the Green New Deal for what they are.

The first good step in the right direction was when President Trump took us out of the Paris Climate Accord, however, it will not become effective until 2020. We need to get him to make it effective now. Contact him by phoning 202-456-1111, Send an email to <https://www.whitehouse.gov/contact/> . Send a post card to 1600 Pennsylvania Ave NW, Washington, DC 20500

Just click to send a prewritten message: Go to jbs.org, then go to ACT NOW in red on the right side of page.

Scroll down to Federal Legislative Action Alerts. Scroll down to Get US out of the Paris Climate Accord Now.

Click to send.

We must pass local legislation to undo the regulations that have already been imposed. Contact your Board of Supervisors with information and ask them to rescind any legislation on this that has already been passed.

Finally, we need to pass HR193 to get US out of the UN, the world government that is the ultimate goal of the Earth Day/Green New Deal promoters. This is just a click away. Go the jbs.org. Then go to ACT NOW in red on the right side of page. Scroll down to Federal Legislative Action Alerts . Scroll down to Support HR193 to Get US out of the UN. Or, contact President Trump and your legislators on their page.

And, share this page with other fellow patriots and with uninformed pro-Agenda 21/30, Earth Day and Green New Deal advocates.

THANK YOU FOR HELPING !

By Sue Long
